

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A system comprising a printing-capable device in communication with a mail server, wherein the printing-capable device has a user interface and accesses an email account which is selected by a user at the user interface, retrieves email headers from the mail server from the user selected email account, receives a user selection of an email header, retrieves an email message corresponding to a selected email header and prints the retrieved email message.
2. (Original) The system of claim 1 wherein the printing-capable device is a multi-function device.
3. (Original) The system of claim 1 wherein the printing-capable device is a printer.
4. (Original) The system of claim 1 wherein the printing-capable device is a copier.
5. (Original) The system of claim 1 wherein the printing-capable device is a facsimile machine.
6. (Original) The system of claim 1 wherein the network is a local area network.
7. (Original) The system of claim 1 wherein the network is a wide area network.
8. (Original) The system of claim 1 wherein the network is at least one of an intranet or the Internet.
9. (Original) The system of claim 1 wherein the printing-capable device retrieves an attachment associated with the retrieved email message and prints the retrieved attachment.

10. (Currently Amended) A method comprising:

receiving a get command to access an email account which is selected by a user at a user interface on a printing-capable device;

locating a mail server via a network in response to the receipt of the get command;

retrieving at least one email header from the mail server from the user selected email account;

displaying the at least one email header on the printing-capable device;

determining whether the at least one email header has been selected;

retrieving at least one email message corresponding to the selected email header, if at least one email header has been selected, from the mail server; and

printing the retrieved email message.

11. (Original) The method of claim 10 wherein the printing-capable device is a multi-function device.

12. (Original) The method of claim 10 wherein the printing-capable device is a printer.

13. (Original) The method of claim 10 wherein the printing-capable device is a copier.

14. (Original) The method of claim 10 wherein the printing-capable device is a facsimile machine.

15. (Original) The method of claim 10 wherein the network is a local area network.

16. (Original) The method of claim 10 wherein the network is a wide area network.

17. (Original) The method of claim 10 wherein the network is at least one of an intranet or the Internet.

18. (Original) The method of claim 10 further comprising:  
retrieving an attachment associated with the retrieved email message;  
and  
printing the retrieved attachment.

19. (New) The system of claim 1 further comprising authenticating the access to the user selected email account before allowing the retrieval of the email headers.

20. (New) The method of claim 10 further comprising authenticating the access to the user selected email account before allowing the retrieving at least one email header.
